

Q: How much did you learn? How much did this course contribute to your education? Did you grow intellectually? Did the course promote thought and discussion?

The course was very interesting and useful.

The most organized course.

It was too simple and Enders I not a very good book to my opinion.

One of the most useful courses.

The course was very valuable for me but I found the grading of homeworks and midterm exam a little bit strange – a I was told, in one problem almost everybody get minus points because some of us wrote something extra.

Q: Please write comments below considering such qualities as: organization, clarity, efficient use of time, and student participation.

He was receptive to question from particular student, but not willing to explain deeply some difficult question from some other students.

Sometimes Prof. Zemcik jut did not manage to exactly answer student' questions. This might be due to misunderstanding somehow. However, at least he tried. Also, it's good that he asks questions during lecture even though student very often somehow were reluctant to answer. Still, this was good.

The lectures were structured very well, everything was explained in great details, the teacher was very well prepared. I can even state that this course was the best I have taken in CERGE-EI.

Organized lectures.

It was too much based on the book.

Overview lecture were very helpful; it would be great to have also lecture note with the same kind of overview we had for the exams.
