### Undergraduate Program in Central European Studies

CERGE-EI and the School of Humanities at Charles University

1. Explain what the Duhem-Quine problem is and why it matters in the present context.
2. Summarize what we can learn from Table 1 in the Harrison & Rutstroem (1999/2008) chapter.
3. Summarize what we can learn from Figure 1 in the Murphy & Stevens chapter.
4. What is hypothetical bias? Why do we care about it? And how can it be dealt with?
5. What role do the Greens play in Czech politics? Specifically, why could one argue that they (and in particular Bursak) are the source of the current political mess?
