Summary of questions 10 and 11:

Q.10 What was the best thing about the instructor and course?

His ability and knowledge to produce real-life examples tailored to the theory.

Friendly, new approach, flexibility...

Well-prepared, presentations are easy to read and understand; interesting case studies, practical exercises.

Q.11 What area(s) should be improved or changed?

I'd give more time for lectures; too much materials need to be covered in a very short period of time.
