

Petar Stankov, Microeconomics, Spring 2014, Verbal student evaluations	
	Similarly to previous semesters, students are encouraged to leave verbal feedback on the quality of teaching of Petar Stankov and on ways to improve the course content. They are encouraged by saying that numeric grades are informative but the verbal feedback is especially valuable in understanding the students' opinion about the seminars.
1	I know that 50% for a passing grade is standard but the course is not easy and it is hard to understand all the material and to score more than 51.
2	The best teacher I have had in the university so far.
3	Active participation from the students could be improved but that mainly depends on the students. Stankov president!
4	I think the course is very useful and maybe if there were answers on the test so we can check when we finish the test.
5	The best teacher I've had. A complete professionalist who gives great examples and has a clear view for the classes.
6	In my opinion the quality of teaching needs no improvement. Stankov for president!!!
7	To draw different situations on new diagrams (step by step) in order to be easier to understand when student revises later.
8	The course is very educational and useful. Thanks!
9	My overall opinion is that the course is very intensive and the quality of teaching is more than satisfying.
10	My opinion is that the course is very useful.
11	The best teacher in the galaxy!
12	Forever in our hearts.
13	The quality of teaching is great! But there is no connection between the professor's way of teaching and that of the assistant. I mean the assistant is much better.
14	Ze best.
15	It's more optimal when we have more time for solving the questions, not being fast.
16	"Go west, come back, kick ass"
17	Speed up when covering old material and topics and present the new issues in a bit slower pace. Everything else was perfect.
18	About the Hicksean and Slutsky approach you can use more colours and bigger graphs. Everything else is perfect.
19	Using more media material. For example, the charts that are drawn on the board are sometimes confusing, while the same chart created by a program is clear.
20	Maybe the course can use some more power point presentations so we all know what we are talking about. Like the graphs would be better shown on a slide. Otherwise it was awesome.
21	I think that the quality of teaching and the way of presenting the material is good, I like the numerous interesting examples you give. However, I think us not understanding the material comes from the "dry" material.
22	I like the fact that there is no barrier between you and the students and we are free to ask you is we have any doubts in understanding the material.
23	Students would appreciate it if along with the handouts you also upload the correct answers on your site. Great teacher!
24	The classes are well organized, present and really useful, but in my opinion the teacher should stimulate the students to participate more actively and discuss problems.
25	Sometimes Stankov spends too much time explaining something simple.
26	I cannot think of any way to improve the course. We are always incentivised to participate and the information is well presented.
27	To stimulate more activities.

28	Stimulate the weekly activities by giving research tasks and homework and check them during the following seminar. Stankov RULZ 9/10
29	One of the best teachers in the university. His knowledge is absolutely stunning. Stankov's teaching techniques are very good. He gives good examples and listens to his students.
30	Mr. Stankov, you are the best teacher that I have ever seen in the UNWE. Your teaching is perfect!!!
31	Maybe if some of the things he explains in Bulgarian would be easier. I liked it when in the beginning we solved every test. I liked also all the examples he gives and the explanation with graphs.
32	To have the answers available online, because it is not very clear because it is not very clear what the answers are during the course. Thus that influence our exam grades.
33	I thoroughly enjoyed Mr. Stankov's classes - on a scale of 1 to 10, I give him 12. P.S. Stankov - president!!!
34	Should give additional readings which cover the next class material, so we can be prepared better for the discussions.
35	The teacher should give additional reading material in order to be prepared for the next time.
36	The course is very well organized and the information provided is presented very clearly. So far this is the best course in the university.
37	The teaching quality of the course is excellent in contrast with the lecture hours - they are the ones that need to be improved.
38	There is no need to improve anything.
39	Asst. Prof. Petar Stankov is the best!!! There is no need to improve the teaching.
40	Legends are born in Varna!
41	Hope I get a good grade on the final exam! VARNA FOR THE WIN!
42	Excellent.
