

Petar Stankov, Microeconomics, Spring 2013, Verbal student evaluations	
	Unlike in previous semesters, students are now encouraged to leave verbal feedback on the quality of teaching of Petar Stankov and on ways to improve the course content. They are encouraged by saying that numeric grades are informative but the verbal feedback is especially valuable in understanding the students' opinion about the seminars.
1	We can read different economic and financial analyses and important topics before sessions and discuss them. It will be useful as economics is a variable study.
2	I like it very much!
3	Too much time is spent explaining one and the same thing. But overall everything is [thumbs up]
4	The teacher who showed us that economics is not just a theory. After meeting the professor, I realized how much I like this discipline. The classes are great.
5	Best course ever + the sense of humor really helps. E.g. motiki.
6	You are doing your job perfectly well. This is honestly the most useful and interesting seminar we've had so far and any stream that will come after us will be lucky to have you. I am very grateful about coursera.org tip that you gave us. You are also very patient with those of us who cannot keep up with the tempo. Every class you revise something from the previous classes that we need to remember and this is truly great.
7	In the beginning of the course Prof. Gechev told us he is leaving us in the hands of probably the best assistant in the whole university and he proved to be right!
8	I think that the course was very well organized. I am glad you were our teacher:) !
9	I like the course and that is why I think there is nothing to be improved.
10	The course is very efficient and understandable. Maybe some economic problems could be solved more deeply.
11	This class is one of my favourites. Mr. Stankov is a great teacher and makes the studying of economics very interesting. The only thing he should emphasize on is giving more examples. That is all:) And give the man a raise!!!
12	I think that you are doing your job great
13	The classes should last about only 40 minutes cause I can't keep my attention for an hour and half.
14	The course is really useful and what I like about it is that we manage to explain everything in 90 minutes. I can't think of a way to improve it.
15	Keep that way:)
16	I want better grades.
17	Once or twice only there were deviations from the topic, but I don't think it's a big deal.
18	You make economics fun and interesting, thank you!
19	You could draw bigger graphs, in order to understand clearly everything.
20	You should give equal attention to all the questions.
21	It's the best class we have.
22	These courses are really useful for me.
23	In my opinion, the quality of teaching in this course is very high. Actually, Asst. Prof. Peter Stankov is one of the best teachers I've had during my educational experience.
24	Maybe give some definitions; everything else was absolutely great! Well done, good job, it was a pleasure for me!
25	Stay so positive, interactive, social and willing to teach as it inspires students!
26	Mr. Stankov could have hardly done any better.
27	The course presents valuable information in a well-organized and easily understandable way.

28	I am very pleased that Mr. Stankov was my teacher for this course. Supply and demand finally made sense. I enjoyed these courses and I am partly sad that Mr. Stankov will not be teaching us next year. I am very happy with these courses!
29	Sometimes you go on too fast with the material, and students need to assimilate it. A little more time for understanding.
30	Classes should be longer. One and a half hours in my opinion is insufficient but I guess this is not up to you.
31	In comparison to other classes your one is the best one. But as in the real life, nothing is perfect but we should do our best in order to get closer to the perfect. So you should be a little bit more tolerant to your students (if this could be considered as setback of the successful teaching process). Anyway the contact between you and us is the only one feature which should be in the mend. All the rest is pretty perfect. Keep on teaching in the same way. Thank you for being my teacher:)
32	As an unprofessional I cannot tell appropriate suggestion for improvement. For me, everything is perfect.
33	Sessions were interesting and the quality of teaching was good enough. Maybe I will be more interested if there are games, encouraging us to participate more in discussions.
34	Sometimes the seminars (the TA sessions) fall behind the lectures. There must be a stronger connection between the topics of the lectures and the TA sessions. Despite that fact, I really appreciate that you give the best out of you to explain the most complex concepts of microeconomics by giving simple examples of reality. Our attention is engaged almost all the time.
35	At the midterm test there should be a number of sets with questions, and every student should receive a few questions on each topic. That way the exam would be completely fair for everyone.
36	Everything is well organized.
37	The course is good and the teacher uses examples from everyday life. One thing that can be done is to get back to the previous lectures because some of the things are very difficult.
38	For me, your teaching is very funny and in the same time, we learn a lot from your great examples. Keep it this way, man!:)
39	I think that the students have to be involved more professionally on firm's process. I think that there have to present more real life situations like games and presentations, including economic thinking. The thing that I most like in the seminars is the given handouts from the teacher. With them, the course of studying is more understandable, enjoyable and useful. /Keep walking:)/
40	The handouts we received throughout the course were very helpful and were a good preparation for the midterm. Some of the handouts may include cases from the business, and processes of firms which we have to solve or make conclusions based on them.
41	I'd recommend accurately pointing which the correct answer of the TA handout question is.
42	I like Asst. Prof. P.Stankov a lot. He stimulates me to study microeconomics and because of him I love it. The only thing he should do is keep doing what he do during the TA sessions and be so great and funny as always.
43	Your classes are very pleasant, professional and useful. I don't think you should change anything.
44	No improvement needed!

45	Stankov President!!!
46	We can include more examples and complex things to be explained in simple words.
47	The course is well organized.
48	I think we need more classes because to me the material is not that easy and more practice is always useful. But this is not up to you, so I don't have any pairs of advice or critics.
49	For me half an hour a week is quite not enough to understand all the things we study but it is not up to you so overall I think you should keep with your excellent work.
50	:)
51	There is no realistic way to improve these classes. Stankov is probably the most brilliant teacher, along with R. Gechev, that I have ever met in my life. I wish everyone a teacher like him.
52	Maybe we should do more tests in order to study more intensive.
53	It will be useful if we had separate handouts with questions for further preparation.
54	Giving students more opportunities for taking part in the (lessons) sessions. -- not only asking questions but also giving examples.
55	Keep doing what you do - you are great at your job! You are very useful, but please do not surprise us with pop-up quiz!
56	I like the teaching - not only does it make the material understandable but also it is fun which engage students' interest. Maybe the only improvement that can be made is to make the classes more coordinated with the lectures - to exercise on the session that we have studied in the lecture the previous week.
57	I think that everything with the course content and the quality of teaching is OK and there is no need of improvement!
58	Keep rockin'!
59	The material in the course should be explained more clearly and the good examples should be a little bit more.
60	Maybe the university should invest more in these TA sessions, I mean that each student should be supplied with a PC in order to improve the teaching process and make the things happen faster.
61	I think we can use more real-life examples in the seminars.
62	Discussing the current economic issues on the basis of what we are studying in the classes.
63	I think the course is very well organized but more visual materials should be used.
64	There is nothing to say about the quality of teaching or how to improve it, because it is already improved.
65	The quality of teaching is really good and I don't think there's anything to improve.
66	To improve the course, you can include some more practical examples, because that is the only way to keep students listening. Keep on mixing fun and work as you do now.
67	I cannot think of a way to improve the quality of teaching in this particular course.
68	I don't think that anything needs to be improved. The only thing that concerned me during the semester was that we had to expect a pop-up quiz all the time and it was a little bit stressful. But I think that asst.prof. Petar Stankov is truly the best assistant we had so far.:)
69	The classes are very entertaining and the teacher makes a lot of effort to explain it to us as simple and understandable as possible.

70	I like the teacher's different and positive approach on the subject which provokes the students' interest.
71	In my opinion he is an excellent teacher and there is no need for improvement.
72	Our teacher is very organized and competent. He made the micro classes interesting and understandable. I would be happy if he is our teacher for the macro classes next year. He must continue being himself.
73	The course is great, I don't think it can be improved much. The quality is the best, maybe only the timing can be better organized.
74	Inspiring teacher, awesome person!
75	I'm very satisfied with the microeconomics course. The time spent in it was very valuable. I can't see a weak point in the teaching of Prof. Stankov.
76	I am very satisfied with the course. The teacher really encourage me in learning the material and he is giving good examples so that I can understand the matter. I think that it would be more efficient if we discuss more deeply the material from the lectures.
77	I think the only way to improve the course is by increasing the number of sessions.
78	The course is one of the most interesting ones in our university and I don't think it should be improved further.
79	The quality of teaching is already high. As for the course content it will be very useful if we do some work on real events, some estimations, examples and researches.
80	In my opinion you should let students talk more. I mean that you should speak less in the TA sessions and make everyone speak everytime so that they could understand the microeconomics better.
81	Just keep doing what you do!:)
82	You are my favorite teacher and I don't even try to praise you or pretend to like you.
83	Classes are really interesting. The presented info is useful.
84	Because of you I started understanding microeconomics!
85	My overall impression is that the course was amazing and if more teachers were like you the education in BG would have been on an excellent level.
86	I'm very stimulated in studying micro, because the way you teach is very inspiring.
87	Great classes! Finally I understand micro! After having a grade 3 in the previous semester, now I completely understood what it is all about and have an excellent grade! You make me come to all your sessions and I enjoyed each one of them! Easy going, funny jokes, useful time! P.S. Calm yourself when a phone rings:)
88	In my opinion, the teacher has organized the classes very well and there is no need for improvement. It depends on the students now whether the course will be successful.
89	Hakuna Matata
90	You are perfect!
91	The best assistant. You made me sit on my ass and learn economics!!!
92	It was a great course and I'm hoping that my future classes at the UNWE will be as awesome as this one!:)
93	The quality of teaching is great! I was extremely pleased to be a part of this class.
94	I think you love your job and you want to teach us. Maybe you are sometimes harsh but I'm sure it will repay us in the future.

95	Mr. Stankov turned my opinion on Microeconomics over. Ever since I attended his classes, I started understanding and even liking the subject. The only thing I would change is that sometimes he gets distracted in the conversation with us and move away from the course topic. Otherwise, I can say with no doubt that he is the favourite teacher in the whole stream.
96	Cannot comment how can you improve the course. If you think something should be changed, then change it, you know best. The course in my opinion is superb. Keep up the excellent work. The best teacher I've ever met.
97	I think we can speed up a little bit the teaching process.
98	You are a great teacher!
99	No need for improvement!
100	The only disadvantage I find is the insufficient time of the lessons. Overall, I consider your work as fully professional and your methods of teaching completely innovative and attention-catching, and I think you are on the right track of improving your skills.
101	I find this course really useful. The only problem is that we should have it also the first semester because for students who has never studied something like this - the material was extremely difficult. Thanks to this seminar I was able to understand the principles and I was interested in Economics. Thank you!
102	You are the greatest teacher I have ever had! Your speech is clear and understandable, close to our ability to understand.
103	Great job! More topical examples from real life would be awesome;)
104	Overall, I presume that the seminars in micro were much more educational, informative and useful than lectures. Honestly, I learned a great many things I have previously never even managed to understand. It was somewhat exhilarating and tedious at the same time.
105	You are the best teacher of economics that I have seen. I like your work and way of teaching very much. I'm sad only because you won't be teaching in our stream.
106	The course is very good. I've learned more in one semester than in 3 years of learning this material. I don't think that there should be a change in the way the course is taught.
107	I'm sorry to say it (your jokes and examples are great) but our group never completed all the economic problems and the homework was never checked. I felt like we were always in a hurry and even the atmosphere was nice, I could not grasp the theory as much as I wanted. My point is that you explain better to the first groups and we were a little bit neglected which is normal but in the end I felt like I was at the wrong university when I saw my results:(Best regards:)
108	Mr. Stankov, I really like your way of teaching. The examples you give during the sessions, as well as your positive mood help me understand the material very well.
109	Even more examples from the real life will be useful. Also - more graphics with explanations about them are preferable.
110	It was a pleasure for me to attend your classes.
111	The course differs from my expectations. It was much better. I am very pleased. All good:)
112	The best and useful teacher I have had. My only concern is you will not teach us macro next year.
113	Mr. Stankov is very professional and gives good and understandable examples. He inspires me to learn economics!:)
114	This class was really useful and I think it triggered my interest in studying micro even further.

115	Your explanations are very clear and simple to understand. You make it possible for everybody to understand the subject matter which is the most important. Thank you!
116	I personally believe that it would be much better for the students if you and the professor work on the same material and elaborate more what goes on in lectures.
117	Only 5s for Mr. Stankov! You are the best asst. prof. we've had this year. Thank you for your work! You made micro a better subject for me. I hope that we could still keep in touch. Very well organized and always giving the best examples. When I start studying at home, I always hear Stankov's voice giving examples and saying "Come on people!" :D Thanks! Keep on being so brilliant.:)
118	Classes are interesting and well organized. Improvement is needed in presenting graphics, for example some multimedia etc.
119	Please explain the formulas in more practical way with more examples. Keep doing such a good job and keep your positiveness:)
120	Stroeja Rulz!
121	Awesome course (probably the best). Keep up the good work.
122	This class was very useful. The only thing that could be improved is time management. Also we can learn more theory.
123	I had great fun during these exams. You succeeded in making this "dry" economy interesting. Thank you.
124	:) Mr. Stankov, you were my best teacher and I think I have learned many, many useful things from you!
125	I don't think there's a need for improvement the course - it is very useful and efficient and so is the quality of teaching. P. S. You are the best!:)
126	It could be interesting having the corrected exercises on the website in order to prepare exams.
127	The quality of teaching is excellent. I love this lesson and professor but I wanna 6. Stankov!
128	I am happy and sorry at the same time. Happy - because Mr. Stankov is one of the best teachers I ever had. Sorry - because I can't help you with your improvement. You are great, I would not change a thing! Thank you for everything!!
129	The first teacher who is really trying to teach us something... and the only one who trully achieves it. Great teacher, great course:}
130	I believe Micro is an important subject and maybe there should be a longer session or 2 in a week but I don't think this depends on you. From time to time an open-book exam might be a good idea. But on overall I am satisfied with your explanations and examples.
131	The most important thing for me is that despite the other teachers who are not interested in their students' success, Mr. Stankov does his job with pleasure, interest and hard work trying to teach us something. You haven't lost your reason for teaching, keep it that way. You really helped me with this course. Thank you!
132	It was a great pleasure for me to participate in the TA sessions. I really like your methods of teaching and that you can give us important information in a funny way. Thank you for making microeconomics looks so much easier than it really is!
133	Nothing can be improved. It is extremely helpful being in the classes. The methodology and the way of teaching are perfect!
134	Keep up the great work! P.S. And don't forget to feed the dragons regularly!
