

Money Market Equilibrium

FIN 204 Lecture 4.1.

Petar Stankov

`petar.stankov@gmail.com`

4 Mar. 2010

Outline

- 1 Supply and Demand for Money
- 2 Money Market Equilibrium: A Graphical Analysis
- 3 Changes in the Money Market Equilibrium

The Liquidity Preference Framework

What is the liquidity preference framework?

Definition: The Liquidity Preference Framework (LPF)

LPF is a *model* of supply and demand for money developed by J.M.Keynes that predicts the equilibrium interest rate on the money market

The Liquidity Preference Framework

What is the liquidity preference framework?

Definition: The Liquidity Preference Framework (LPF)

LPF is a *model* of supply and demand for money developed by J.M.Keynes that predicts the equilibrium interest rate on the money market

Assumptions

- Wealth consists of money and bonds only
- Money does not bring interest
- Interest rate on bonds is $i > 0$

The Liquidity Preference Framework

What happens if the interest rate i rises?

The Liquidity Preference Framework

What happens if the interest rate i rises?

- bond prices go down

The Liquidity Preference Framework

What happens if the interest rate i rises?

- bond prices go down
- expected return on bonds goes up

The Liquidity Preference Framework

What happens if the interest rate i rises?

- bond prices go down
- expected return on bonds goes up
- demand for bonds increases

The Liquidity Preference Framework

What happens if the interest rate i rises?

- bond prices go down
- expected return on bonds goes up
- demand for bonds increases
- demand for money decreases

The Liquidity Preference Framework

What happens if the interest rate i rises?

- bond prices go down
- expected return on bonds goes up
- demand for bonds increases
- demand for money decreases

Opportunity cost explanation for the decline in money demand

The Liquidity Preference Framework: A Graphical Analysis

Changes in The Liquidity Preference Framework Equilibrium

Two main factors for change in demand for money:

Changes in The Liquidity Preference Framework Equilibrium

Two main factors for change in demand for money:

- wealth increases $\Rightarrow$ money demand increases

Changes in The Liquidity Preference Framework Equilibrium

Two main factors for change in demand for money:

- wealth increases $\Rightarrow$ money demand increases
- inflation increases $\Rightarrow$ money demand increases

Changes in The Liquidity Preference Framework Equilibrium

Two main factors for change in demand for money:

- wealth increases $\Rightarrow$ money demand increases
- inflation increases $\Rightarrow$ money demand increases

Any objections?

Differences Between the Asset Demand and LPF

The case of wealth and money demand

Asset Demand Framework

Differences Between the Asset Demand and LPF

The case of wealth and money demand

Asset Demand Framework

- Wealth $\uparrow \Rightarrow$

Differences Between the Asset Demand and LPF

The case of wealth and money demand

Asset Demand Framework

- Wealth $\uparrow \Rightarrow$
- Demand for bonds

Differences Between the Asset Demand and LPF

The case of wealth and money demand

Asset Demand Framework

- Wealth $\uparrow \Rightarrow$
- Demand for bonds $\uparrow \Rightarrow$

Differences Between the Asset Demand and LPF

The case of wealth and money demand

Asset Demand Framework

- Wealth $\uparrow \Rightarrow$
- Demand for bonds $\uparrow \Rightarrow$
- Price of bonds

Differences Between the Asset Demand and LPF

The case of wealth and money demand

Asset Demand Framework

- Wealth $\uparrow \Rightarrow$
- Demand for bonds $\uparrow \Rightarrow$
- Price of bonds $\uparrow \Rightarrow$

Differences Between the Asset Demand and LPF

The case of wealth and money demand

Asset Demand Framework

- Wealth $\uparrow \Rightarrow$
- Demand for bonds $\uparrow \Rightarrow$
- Price of bonds $\uparrow \Rightarrow$
- Interest rate

Differences Between the Asset Demand and LPF

The case of wealth and money demand

Asset Demand Framework

- Wealth $\uparrow \Rightarrow$
- Demand for bonds $\uparrow \Rightarrow$
- Price of bonds $\uparrow \Rightarrow$
- Interest rate $\downarrow \Rightarrow$

LPF (Keynes)

Differences Between the Asset Demand and LPF

The case of wealth and money demand

Asset Demand Framework

- Wealth $\uparrow \Rightarrow$
- Demand for bonds $\uparrow \Rightarrow$
- Price of bonds $\uparrow \Rightarrow$
- Interest rate $\downarrow \Rightarrow$

LPF (Keynes)

- Interest rate $\downarrow \Rightarrow$

Differences Between the Asset Demand and LPF

The case of wealth and money demand

Asset Demand Framework

- Wealth $\uparrow \Rightarrow$
- Demand for bonds $\uparrow \Rightarrow$
- Price of bonds $\uparrow \Rightarrow$
- Interest rate $\downarrow \Rightarrow$

LPF (Keynes)

- Interest rate $\downarrow \Rightarrow$
- Bonds less attractive $\Rightarrow$

Differences Between the Asset Demand and LPF

The case of wealth and money demand

Asset Demand Framework

- Wealth $\uparrow \Rightarrow$
- Demand for bonds $\uparrow \Rightarrow$
- Price of bonds $\uparrow \Rightarrow$
- Interest rate $\downarrow \Rightarrow$

LPF (Keynes)

- Interest rate $\downarrow \Rightarrow$
- Bonds less attractive $\Rightarrow$
- Demand for bonds $\downarrow \Rightarrow$

Differences Between the Asset Demand and LPF

The case of wealth and money demand

Asset Demand Framework

- Wealth $\uparrow \Rightarrow$
- Demand for bonds $\uparrow \Rightarrow$
- Price of bonds $\uparrow \Rightarrow$
- Interest rate $\downarrow \Rightarrow$

LPF (Keynes)

- Interest rate $\downarrow \Rightarrow$
- Bonds less attractive $\Rightarrow$
- Demand for bonds $\downarrow \Rightarrow$
- Money demand $\uparrow$

The **Classic LPF** explanation:

Differences Between the Asset Demand and LPF

The case of wealth and money demand

Asset Demand Framework

- Wealth $\uparrow \Rightarrow$
- Demand for bonds $\uparrow \Rightarrow$
- Price of bonds $\uparrow \Rightarrow$
- Interest rate $\downarrow \Rightarrow$

LPF (Keynes)

- Interest rate $\downarrow \Rightarrow$
- Bonds less attractive $\Rightarrow$
- Demand for bonds $\downarrow \Rightarrow$
- Money demand $\uparrow$

The **Classic LPF** explanation: Wealth $\uparrow \rightarrow$

Differences Between the Asset Demand and LPF

The case of wealth and money demand

Asset Demand Framework

- Wealth $\uparrow \Rightarrow$
- Demand for bonds $\uparrow \Rightarrow$
- Price of bonds $\uparrow \Rightarrow$
- Interest rate $\downarrow \Rightarrow$

LPF (Keynes)

- Interest rate $\downarrow \Rightarrow$
- Bonds less attractive $\Rightarrow$
- Demand for bonds $\downarrow \Rightarrow$
- Money demand $\uparrow$

The **Classic LPF explanation**: Wealth $\uparrow \rightarrow$ people want to hold more money for the increased number of transactions $\uparrow \rightarrow$ money demand $\uparrow$.

Differences Between the Asset Demand and LPF

The case of inflation and money demand

Asset Demand Framework

Differences Between the Asset Demand and LPF

The case of inflation and money demand

Asset Demand Framework

- Inflation $\uparrow \Rightarrow$

Differences Between the Asset Demand and LPF

The case of inflation and money demand

Asset Demand Framework

- Inflation $\uparrow \Rightarrow$
- Exp.Ret. on Real Assets

Differences Between the Asset Demand and LPF

The case of inflation and money demand

Asset Demand Framework

- Inflation $\uparrow \Rightarrow$
- Exp.Ret. on Real Assets $\uparrow \Rightarrow$

Differences Between the Asset Demand and LPF

The case of inflation and money demand

Asset Demand Framework

- Inflation $\uparrow \Rightarrow$
- Exp.Ret. on Real Assets $\uparrow \Rightarrow$
- Demand of bonds

Differences Between the Asset Demand and LPF

The case of inflation and money demand

Asset Demand Framework

- Inflation $\uparrow \Rightarrow$
- Exp.Ret. on Real Assets $\uparrow \Rightarrow$
- Demand of bonds $\downarrow \Rightarrow$

LPF (Keynes)

Differences Between the Asset Demand and LPF

The case of inflation and money demand

Asset Demand Framework

- Inflation $\uparrow \Rightarrow$
- Exp.Ret. on Real Assets $\uparrow \Rightarrow$
- Demand of bonds $\downarrow \Rightarrow$

LPF (Keynes)

- Demand of bonds

Differences Between the Asset Demand and LPF

The case of inflation and money demand

Asset Demand Framework

- Inflation $\uparrow \Rightarrow$
- Exp.Ret. on Real Assets $\uparrow \Rightarrow$
- Demand of bonds $\downarrow \Rightarrow$

LPF (Keynes)

- Demand of bonds $\downarrow \Rightarrow$

Differences Between the Asset Demand and LPF

The case of inflation and money demand

Asset Demand Framework

- Inflation $\uparrow \Rightarrow$
- Exp.Ret. on Real Assets $\uparrow \Rightarrow$
- Demand of bonds $\downarrow \Rightarrow$

LPF (Keynes)

- Demand of bonds $\downarrow \Rightarrow$
- Money demand $\uparrow$

The **Classic LPF** explanation:

Differences Between the Asset Demand and LPF

The case of inflation and money demand

Asset Demand Framework

- Inflation $\uparrow \Rightarrow$
- Exp.Ret. on Real Assets $\uparrow \Rightarrow$
- Demand of bonds $\downarrow \Rightarrow$

LPF (Keynes)

- Demand of bonds $\downarrow \Rightarrow$
- Money demand $\uparrow$

The **Classic LPF explanation**: Inflation $\uparrow \rightarrow$

Differences Between the Asset Demand and LPF

The case of inflation and money demand

Asset Demand Framework

- Inflation $\uparrow \Rightarrow$
- Exp.Ret. on Real Assets $\uparrow \Rightarrow$
- Demand of bonds $\downarrow \Rightarrow$

LPF (Keynes)

- Demand of bonds $\downarrow \Rightarrow$
- Money demand $\uparrow$

The **Classic LPF explanation**: Inflation $\uparrow \rightarrow$ money are worth less $\rightarrow$

Differences Between the Asset Demand and LPF

The case of inflation and money demand

Asset Demand Framework

- Inflation $\uparrow \Rightarrow$
- Exp.Ret. on Real Assets $\uparrow \Rightarrow$
- Demand of bonds $\downarrow \Rightarrow$

LPF (Keynes)

- Demand of bonds $\downarrow \Rightarrow$
- Money demand $\uparrow$

The **Classic LPF explanation**: Inflation $\uparrow \rightarrow$ money are worth less $\rightarrow$ people want to consume the same quantities of goods $\rightarrow$

Differences Between the Asset Demand and LPF

The case of inflation and money demand

Asset Demand Framework

- Inflation $\uparrow \Rightarrow$
- Exp.Ret. on Real Assets $\uparrow \Rightarrow$
- Demand of bonds $\downarrow \Rightarrow$

LPF (Keynes)

- Demand of bonds $\downarrow \Rightarrow$
- Money demand $\uparrow$

The **Classic LPF explanation**: Inflation $\uparrow \rightarrow$ money are worth less $\rightarrow$ people want to consume the same quantities of goods $\rightarrow$ nominal money demand $\uparrow$.

Differences Between the Asset Demand and LPF

The case of inflation and money demand

Asset Demand Framework

- Inflation $\uparrow \Rightarrow$
- Exp.Ret. on Real Assets $\uparrow \Rightarrow$
- Demand of bonds $\downarrow \Rightarrow$

LPF (Keynes)

- Demand of bonds $\downarrow \Rightarrow$
- Money demand $\uparrow$

The **Classic LPF explanation**: Inflation $\uparrow \rightarrow$ money are worth less $\rightarrow$ people want to consume the same quantities of goods $\rightarrow$ nominal money demand $\uparrow$.

Which theory is the correct one?

Factors Shifting the Demand for Money

A summary

Variable	Change in Variable	Change in Money Demand (M^d) or Supply (M^s)	Change in Interest Rate
----------	--------------------	--	-------------------------

Income

↑

$M^d \uparrow$

↑

Price level

↑

$M^d \uparrow$

↑

Factors Shifting the Supply of Money

Factors Shifting the Supply of Money

The Central Bank controls money supply

Factors Shifting the Supply of Money

The Central Bank controls money supply

Factors Shifting the Supply of Money

The Central Bank controls money supply

Is that always the case?
