Classes are well organized and clear. The teacher focused on the most important topics and tried to make students understand each topic rather than tried to have us ~~study~~ covered all the topics in the book, which is a very approach of teaching. Participation in classes and seminars are highly encouraged

I can say that this class was very useful and that all the contributions that we have from this subject was due to the teacher. Always ready to explain everything, giving us interesting examples. He always tried to increase the discussions in the class, which I believe ~~was~~ very useful for all of the students.

I think, the course was very poor.
The teacher motivated the students,
I must say that I have only learnt
some economic concepts just now
despite my previous economic education.
I liked the practical approach, examples
and his attitude towards the students.
Especially convincing to MICRO part!
